

Modular Building Solutions for Temporary and Emergency Usage

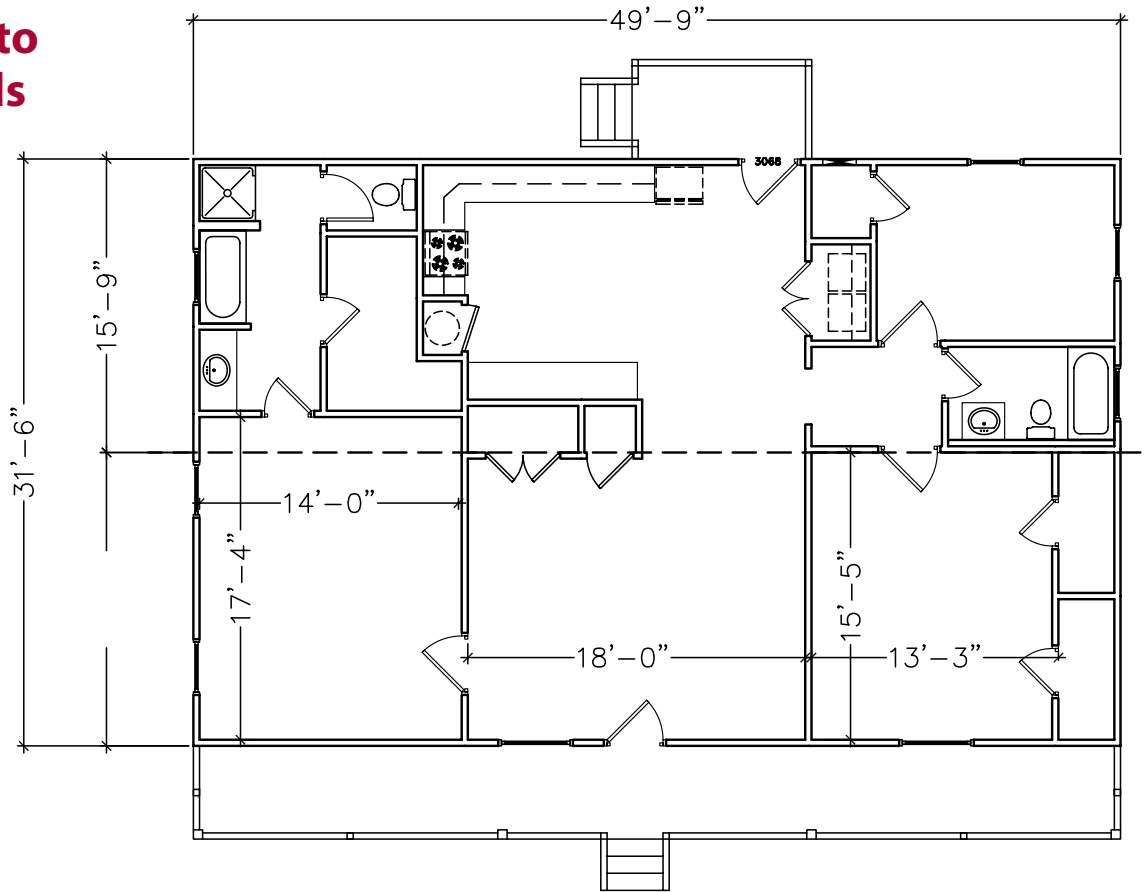

**Disaster
Recovery
And Other
Emergency
Short Term Needs**

Responsive, Reliable, Resourceful...
service and experience make the difference

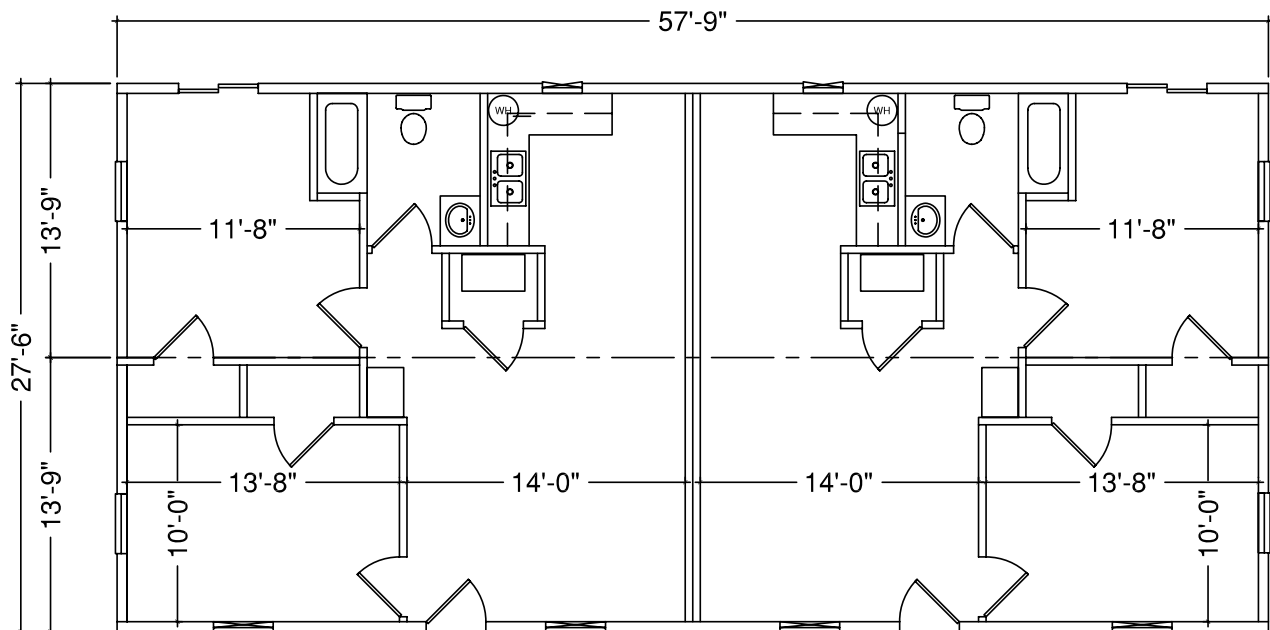

Rapid Response to Emergency Needs

Custom Designed Multipurpose Facilities With Maximum Flexibility

Disaster Relief and Emergency Housing

When disaster strikes, government and relief agencies trust Morgan to deliver fast modular building solutions that provide a reliable base of operation for recovery teams and emergency medical services. Morgan provides low-cost, rapid response shelter solutions for displaced people and their possessions. Mass storage solutions protect valuable equipment and warehouse goods when primary structures are lost to fire, flood, storms, or other disasters.

Our people's attention to detail is the Morgan difference

Over 50 Major Emergency Relief Projects in Recent Years

That's a track record that demonstrates Morgan's significant value in times of extreme emergency. We have learned that these needs are not infrequent, and that planning and preparedness are vital. You need to know who to turn to *before* disaster strikes.

Morgan operates six full line manufacturing plants, and can custom design, build, ship, and install a virtually self-contained relief encampment, with housing for workers and displaced residents, shower facilities, rest rooms, cafeterias, office space, storage, maintenance, and medical facilities.

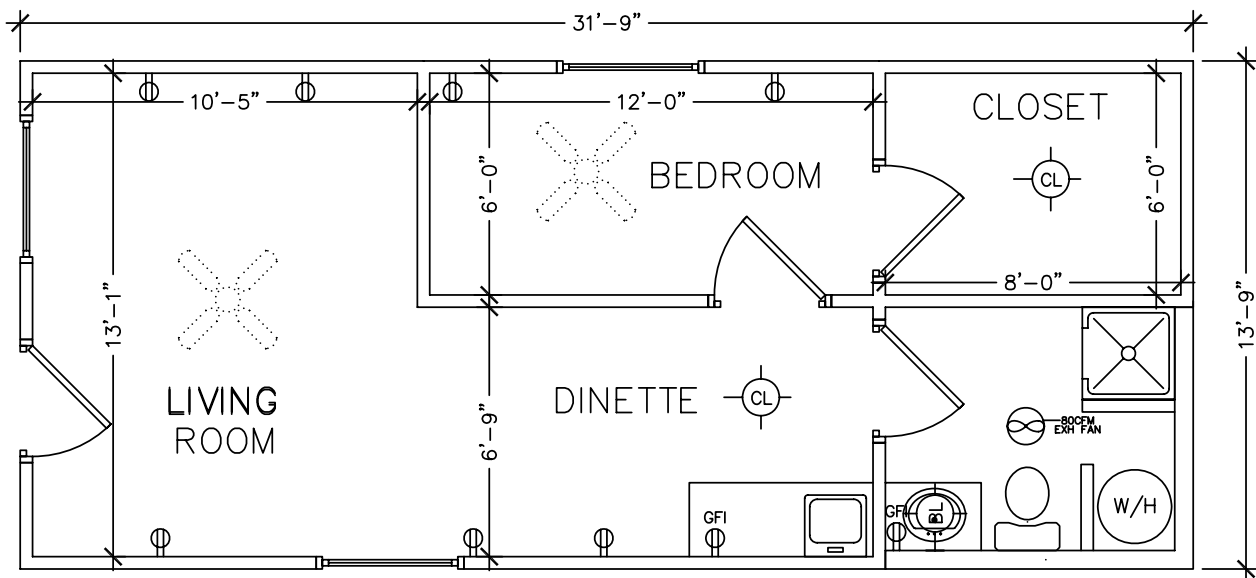

Our manufacturing expertise even allowed us to quickly replace a devastated college campus allowing classes to resume with a minimum of lost class time.

Minimal Reliance on Local Resources

Because all of our modular buildings are factory built by our own employees, we control every step of the process from quote to delivery. And with up to 90% of the construction work completed off site, Morgan modular buildings do not consume limited and often expensive local resources.

Morgan can build and deliver the equivalent of a complete mid-sized town in less than 90 days – almost anywhere.

We deliver critical solutions...on time and on budget.

The Morgan Advantage: Rapid Response, Flexible Solutions

No one can anticipate a disaster, but you can plan an effective response. When homes, businesses, schools, and medical facilities are lost, you need to have a responsive and reliable partner to help with relief and rebuilding.

In an emergency situation, there is a limited availability of local materials and workers. Traditional construction is simply too costly and time consuming to be a realistic option.

Morgan's buildings are factory built, under controlled conditions, by our own skilled craftsmen. At every one of our six manufacturing plants, our own experienced employees perform all of the work. We continuously monitor and manage every step of the process to ensure strict adherence to quality standards, and to your deadlines. Your building arrives 90% complete, and goes into service faster.

Morgan buildings can be stronger structurally and more energy efficient than traditional construction, providing significant benefits in lower lifetime operating and maintenance costs.

We've spent more than 45 years perfecting modular construction to be the most responsive – and responsible – solution to your work force needs. After more than 100 million square feet, we're confident that you'll find the Morgan Building System to be the most responsive, most versatile, and most cost effective solution to your emergency shelter needs.
